National Science Day

(28th February, 2019)

National Science Day (NSD) is being celebrated on every February 28 from 1987. On this day in 1928, Sir C V Raman discovered Scattering of light later named after him as "Raman Effect". He received Nobel Prize in Physics for his discovery in 1930. It is being celebrated to bring Science in the forefront to inculcate scientific temper from scientific achievements of the country. In this regard, RGUKT is conducting 'One Day Seminar' inviting eminent academicians and scientists from various fields to enlighten the young minds here in the Campus
