SHORT TERM TRAINING PROGRAMME ON ASPEN PLUS

01st - 04th, November, 2022

9:00AM to 5:00PM

Organized by

DEPARTMENT
of
CHEMICAL ENGINEERING

ABOUT THE INSTITUTION

RAJIV GANDHI UNIVERSITY OF KNOWLEDGE TECHNOLOGIES (RGUKT) has been established by the Government of erstwhile combined Andhra Pradesh in 2008, and the Basar has been taken over by the Government of Telangana, after due amendment of the Rajiv Gandhi University for Knowledge Technologies Act, 2008.

ABOUT CHEMICAL ENGINEERING

The department of Chemical Engineering was established in the year 2008 to offer an undergraduate(UG) program aiming to be a global center of academic and research excellence in Chemical Engineering. The Department has a strong fundamental curriculum integrated by electives in the main emerging areas and industry-ready courses.

ABOUT RESOURCE PERSON

Mr. Ravichand Kancharla is graduated from OUCT, and did his Masters in IITB and PhD in IICT, OUCT.

He is well experienced in teaching (Petroleum Engineering) and He is having 7+ years of experience on SimSci PRO/II and also he having 4 years of experience as a Process Engineer at NH₃ Plant (EPC contract).

ABOUT ASPEN PLUS

Aspen Plus is the leading Chemical Process Simulator in the market. It is a software that will allow the user to build a process model and then simulate it using complex calculations(models, equations, math calculations, regressions, etc).It will Maximize profits using a plant-wide simulation solution that combines unparalleled accuracy and engineering collaboration with time-saving workflows.

LEARNING OUTCOMES

After having attended this training Programme, participants will

- Be able to define input-output products and process parameters which are essential step
- for simulation of chemical and petrochemical plants,
- Have insight in process simulation, unit operation, heat transfer processes, control basics,and analyzing thermodynamic behavior of processes.
- Be able to use Simulation Environment
- Analysis Tools: Sensitivity Analysis &
- Optimization with Constraints
- Reporting Relevant Results (Graphs, Charts, Tables, etc...)

CONTENTS OF THE PROGRAMME

- Database definition (determining required feedstock)
- Property methods, the importance and way to select, building a flow sheet
- Model the most basic unit operations of a chemical plant such as Pump, Heat exchangers, Heater, etc.
- Defining process parameters, Generating pressure-composition, temperature composition, and viscosity-temperature curves, etc.,
- Running some process examples.

OBJECTIVES

The workshop covers both fundamentals and branch specific concepts with hands on sessions. This would immensely help the students at large.

- To improve employability skills of Engineering students
- To bridge the skill gaps and make students Industry Ready
- To provide an opportunity to students to develop inter-disciplinary skills
- To create awareness of Aspen Plus in Engineering Applications
